Speed your Business Journey with a Technology Advisor

As a business leader, you have to guide your team to success. So you need a technology advisor who understands that success is a journey. After [30 years](#), we have experienced this journey so many times, we now see it as a cycle of stages. As your business evolves, technology is evolving along its own path. So to make sure you have the best tools to meet the challenges you're facing, we recommend you recognize these [stages in your journey](#).

Speed your journey

Find out how your Customer Relationships evolved in the Pandemic

According to Creatio's recent report, "Reinventing Customer Experience," the expectations of your customers are evolving, perhaps faster than your customer relationship management system. [Download the report](#) today, or look below for our summary of the key points. Research findings about customer relationships include:

- ⇒ 80% of consumers say they're having more digital interactions with brands
- ⇒ 67% of customers still want to speak with a person at some stage
- ⇒ 50% of customers look forward to seeing more seamlessly integrated digital experiences

See what they said

We started with a verse and it became our purpose.
E6 = Ephesians 6:12-16

For our struggle is not against flesh and blood, but against the rulers, against the authorities, against the powers of this dark world and against the spiritual forces of evil in the heavenly realms. Therefore put on the full armor of God, so that when the day of evil comes, you may be able to stand your ground, and after you have done everything, to stand. Stand firm then, with the belt of truth buckled around your waist, with the breastplate of righteousness in place, and with your feet fitted with the readiness that comes from the gospel of peace. In addition to all this, **take up the shield of faith**, with which you can extinguish all the flaming arrows of the evil one.

Our Mission

At E6 Solutions, we help our customers by delivering the customer experience, service, and solutions they need to achieve exponential growth.
